

LIRA MicroGold™ VTM

CAPSULES FOR ADULT CATTLE - AQUA

A Premium Vitamin-Trace Mineral Nutritional Supplement Capsule with **Niashure™ Niacin** and Mineral Proteinates

Feed as a nutritional support during times of sluggish appetite, heat stress or stress during calving, shipping, feed changes or when vitamin and trace mineral supplementation is indicated.

21 gram gelatin capsules available in:

40 count pail (6 per case)

128 count box

Combination box: 128 count LIRA MicroGold™ VTM
128 count LIRA MicroGold™ PLUS

1 capsule per head

(1 – 2 times per day, for up to 3 days)

Features:

- ◆ **Niashure™ Niacin** – 1,900 mg of Niashure Niacin and 1,900 mg of niacin per capsule.
- ◆ **Vitamins – A, D₃ and E** – 950,000 IU Vitamin A, 140,000 IU Vitamin D₃ and 3,800 IU Vitamin E per capsule.
- ◆ **Microminerals** – A full complement of supplemental proteinated microminerals: Cobalt (Co), Iron (Fe), Copper (Cu), Manganese (Mn) and Zinc (Zn).
- ◆ **Selenium yeast** – organic form of highly bioavailable Selenium (Se).

Benefits:

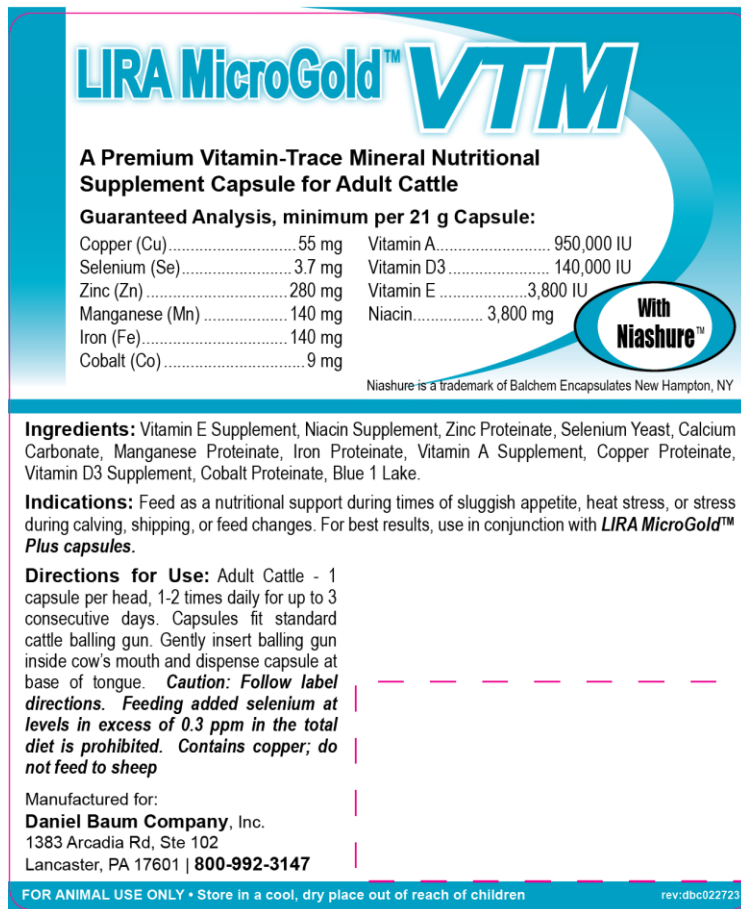

- ◆ **Niashure Niacin** (microcoated) bypasses the rumen (85% rumen stability) and delivers eight (8) times more bioavailable niacin to the small intestine compared with uncoated niacin. The 1,900 mg of Niashure Niacin is equivalent to 15,200 mg of uncoated niacin, making this capsule the industry leader in providing supplemental bioavailable niacin where it is needed.
- ◆ One of the most potent fat-soluble vitamin (vitamins A, D₃ and E) capsules on the market.
- ◆ Organic selenium derived from yeast which synthesizes selenomethionine in place of methionine. The selenomethionine form of selenium is natural and rapidly metabolized within the body to yield high bioavailability and retention.
- ◆ Proteinates of supplemental microminerals Cobalt (Co), Copper (Cu), Iron (Fe), Manganese (Mn) and Zinc (Zn) provide storage stability, reduced deleterious interaction with crucial vitamins, and increased bioavailability in the animal.
- ◆ **For best results, use in conjunction with LIRA MicroGold PLUS capsules.**

Each component of **LIRA MicroGold™ VTM** capsules has been selected for its unique storage stability characteristics within the capsule and bioavailability characteristics within the bovine digestive system. This powerful vitamin-trace mineral capsule offers an effective pre- and post-calving boost, an appetite stimulant, and effective positive dose administration for “off feed” and “stress” situations.

Use **LIRA MicroGold VTM** capsules when supplemental vitamin and trace mineral administration is warranted.

LIRA MicroGold VTM capsule is the innovative industry leader in ingredients that bypass the rumen and provide the most bioavailable vitamins and trace minerals to the small intestine where they can offer the most benefit.

Compare our **LIRA MicroGold VTM** capsule to the competition and you will find higher levels of fat-soluble vitamins (A, D₃ and E), a full complement of highly bioavailable proteinated microminerals (Co, Cu, Fe, Mn and Zn), and industry-leading levels of two forms of niacin.

LIRA MicroGold™ VTM

A Premium Vitamin-Trace Mineral Nutritional Supplement Capsule for Adult Cattle

Guaranteed Analysis, minimum per 21 g Capsule:

Copper (Cu).....	55 mg	Vitamin A.....	950,000 IU
Selenium (Se).....	3.7 mg	Vitamin D3.....	140,000 IU
Zinc (Zn).....	280 mg	Vitamin E.....	3,800 IU
Manganese (Mn).....	140 mg	Niacin.....	3,800 mg
Iron (Fe).....	140 mg		
Cobalt (Co).....	9 mg		

With Niashure™

Niashure is a trademark of Balchem Encapsulates New Hampton, NY

Ingredients: Vitamin E Supplement, Niacin Supplement, Zinc Proteinate, Selenium Yeast, Calcium Carbonate, Manganese Proteinate, Iron Proteinate, Vitamin A Supplement, Copper Proteinate, Vitamin D3 Supplement, Cobalt Proteinate, Blue 1 Lake.

Indications: Feed as a nutritional support during times of sluggish appetite, heat stress, or stress during calving, shipping, or feed changes. For best results, use in conjunction with **LIRA MicroGold™ Plus capsules**.

Directions for Use: Adult Cattle - 1 capsule per head, 1-2 times daily for up to 3 consecutive days. Capsules fit standard cattle balling gun. Gently insert balling gun inside cow's mouth and dispense capsule at base of tongue. **Caution: Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited. Contains copper; do not feed to sheep**

Manufactured for:
Daniel Baum Company, Inc.
1383 Arcadia Rd, Ste 102
Lancaster, PA 17601 | **800-992-3147**

FOR ANIMAL USE ONLY • Store in a cool, dry place out of reach of children rev:dbc022723

Special Notes:

Niashure™ Niacin is a trademark of Balchem Encapsulates, New Hampton, NY.

LIRA MicroGold VTM capsules fit most standard balling guns.

Care should be taken to place LIRA MicroGold VTM capsules on the back of the animal's tongue and to allow the animal to swallow.

Do not administer LIRA MicroGold VTM capsules to animals that are unable to swallow.
